

## //Program to demonstrate static variables, methods, and blocks.

```
public class StaticMethodDemo
{
    int rollNo;
    static String empTrainer;
    private static String name;
    StaticMethodDemo(int rollNo)
    {
        this.rollNo = rollNo;
    }
    static
    {
        empTrainer = "Mr.Naresh Chandra";
    }
    public void display()
    {
        System.out.println(rollNo+"\t"+empTrainer);
    }
    static void changeTrainer()
    {
        empTrainer=name;
    }
    public static void main(String[] args)
    {
        StaticMethodDemo S1=new StaticMethodDemo(123);
```

```
S1.display();  
StaticMethodDemo S2=new StaticMethodDemo(124);  
S2.display();  
// StaticMethodDemo.changeTrainer S3 = new StaticMethodDemo(125) ;  
// S3.Display();  
}  
}
```
